To Whom It May Concern:

I am glad to recommend Geert De Cnodder, as one of his colleague, mentor and lead.

I sum up his talent as smart quick learner. He is still young and doesn't have very long experience in this industry. However, he has understood our pipeline, quality we required and role we expected surprisingly quickly soon after he joined our team.

On top of that, He has quite good understanding on technical aspect of game developing. He learnt and understood our engine and tool, collision physics setting quite well and sometimes gave us useful feedbacks to improve them.

At the same time, he has flexible and objective mind-set. He is always keen to comprehend feedbacks given from others, and improve his own skill and works' quality based on the others' opinions.

Regarding his personality, he is a friendly person and a strong team player,

Communicating very often with anybody else in our office not only within art team regardless the department. One good example to explain this is that he printed out Pokémon's reference and persuaded us to draw them on a big sheet of paper at our free space, which helped lots to make good atmosphere in office.

Hence, from many aspects from artistic, technical and personal standpoints, I strongly recommend him. He will definitely contribute to your team and project.

Please contact me for any additional information if you would need.

Sincerely,

A handwritten signature in black ink, appearing to read 'Hiroshi Sakakibara'.
